Summary

Hard-working, innovative and motivated full-stack web developer with extensive training in multiple programming languages.

Eagerly seeking new challenges with functional-design teams to produce outstanding products. Passionate about learning new technologies.

Developed multiple full-stack web applications from scratch, and deployed them on Linux servers AWS EC2.

Worked with popular JavaScript libraries: jQuery, Angular JS and Front-End frameworks like Bootstrap.

Broad knowledge and understanding of JavaScript ES6, CSS3, HTML5.

Technical Skills

- Programming: JavaScript , HTML, CSS, TypeScript

- Frameworks/Libraries: jQuery, ReactJS, AngularJS, Express.js, Node.js, Bootstrap

- Databases: MySQL, NoSQL (MongoDB)

- Version Control: Git, Github

- Servers: Linux AWS (Amazon web services) EC2, Heroku

- Development Tools: Visual Studio Code

Projects	• **[Omnifood](#)** (HTML, CSS, jQuery)
	A responsive modern static website for a fictitious food delivery company.
	• **[Todo List App](#)** (Express.js, Node.js, JavaScript, MongoDB, EJS, Bootstrap)
	Web application built from scratch with MVC and CRUD methodologies that lets the user create, edit and delete tasks.
	• **[Pokemon API](#)** (JavaScript, jQuery, AJAX, HTML, CSS)
	Web application that displays a pokemon's information when an image is clicked using a public Pokemon API.
Certification	**Coding Dojo – San Jose, CA 2017**
	• One of the highest-rated coding bootcamps in the world, teaching three full techonology stacks.
	• Followed my passion for software development and enrolled in a 14-week program at one of the highest-rated coding bootcamps in the world and learned 3 full technology stacks.
	• Earned over 1000 hours of coding experience and developed multiple web applications in MEAN, Python and Java.
Education	College of San Mateo
Interests	Learning Python, Django, Java Spring Boot, Bootstrap
